The gun must be placed in a standing position.

Never place the heated tool on the side.

Never point the nozzle upwards .

Caution!

The hot nozzle can cause damage and/or burns. After use, allow the gun to cool down completely before storing it. Keep safely and out of reach of children.

► Handling

Please note the following handling points

- ✓ Let the gun pre-heat for about 3-5 minutes
- ✓ Never pull a stick backwards from the gun!
- ✓ Never place the gun on the side and do not point upwards
- ✓ Use only recommended adhesives
- ✓ Keep the melting chamber free of dirt and dust
- ✓ Protect the device from moisture and liquids
- ✓ Check the battery status occasionally

► Claims

Important info regarding claims

When we dismantle a tool, we can always see what caused the malfunction. In 99% of the cases, one of the below mentioned points has occurred - they are not valid reasons for a complaint. If you are convinced that none of the points have occurred, we will gladly check the tool in our workshop.

The following errors are not valid reasons for complaint:

- The gun was placed on its side.
- The gun and nozzle were held upwards for too long.
- The gun was not heated enough before starting.
- A stick was pulled backwards from the gun.
