

Wood Mastic Powder Filler

Powder Filler is perfect for bigger knots and brushing.

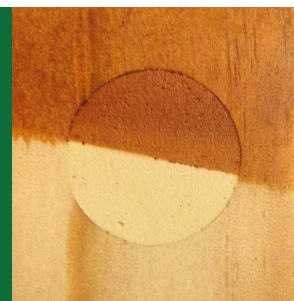

Powder Filler is one of our unique repair products. Mix the Powder Filler with water and you get an excellent paste filler you can use straight ahead. It is possible to add pigment when mixing and you can mix the Powder Filler colors to get the exact tone you want.

Powder Filler is suitable for knots, cracks, and other defects with a depth up to 15 mm. Powder Filler accepts all types of surface treatments. There is no expiration date on the raw powder. Just remember to keep the bucket tightly closed and only mix the exact portion you need for repairs.

Instructions:

- 1) 1 part water to 3 parts powder - mix well.
- 2) Only mix the amount you need.
- 3) Do not use an old portion of mixed Powder Filler. Mix a new portion.
- 4) Remember to put the lid on the bucket when you take a break.

Wood Mastic Powder Filler accepts stain very well.

Powder Hardener

Need an even more resistant filler?

Powder Hardener increases the strength of Powder Filler which makes it a popular product in the flooring industry. Powder Hardener fastens the drying time of Powder Filler repairs, increases the general resistancy of the repairs, and makes the paste filler suitable for hard brushing.

Mixing ratio: Replace 10-20% of the water for Powder Filler with Powder Hardener.
